

Shell Scripting Basics

1. Write a script that reads your age and prints a message.
2. What is the difference between \$0, \$1, and \$#?
3. Modify your script to take name and age as arguments and print a greeting.
4. Write a script that checks whether a given number is even or odd.
5. What does the -eq and -gt comparison operator do?
6. Explain the purpose of 'if', 'else', and 'fi' in a shell script.
7. Write a script to print numbers from 1 to 10 using a for loop.
8. Write a while loop that counts down from 5 to 1.
